

● Specifications

| Product name | Compressor Nebulizer | | |
|--|---|--------------------------------|--------------------------------|
| Model | ZSR- MCN-01 | ZSR- MCN-02 | ZSR- MCN-03 |
| Air Flow | 10-12L/min | 8-10L/min | 8-10L/min |
| Dimensions | 264 (L) x 189 (W) x 182.5(H)(mm) | 266 (L) x 183 (W) x 128(H)(mm) | 211 (L) x 156 (W) x 128(H)(mm) |
| Weight | 2.4kg | 1.8kg | 1.7kg |
| Power source | AC220V±10V,50Hz±1Hz | | |
| Rated power | ≤140VA | | |
| Noise | ≤60dB | | |
| Spray rate | ≥0.30ml/min (NaCl 0.9%) | | |
| Diameter of Atomized Particles | Atomized particles 1μ-5μin diameter accounts for over 70%. | | |
| Container Capacity | 2-8ml | | |
| Medication Residue | ≤0.5ml | | |
| Accessories | Compressor Nebulizer, tube for nebulizer, fuse, nozzle for mouth, face mask (adult, children), filter cotton, instructions, power cord, certificate, warranty card. | | |
| The dimensions, appearance and color of the equipment may change without prior notice, in which case the actual configuration is used as a standard. | | | |

Compressor Nebulizer ZSR-MCN series 01/02/03

Medical grade professional compressor nebulizer

- Made from the best medical material.
- Efficient filtering technology ensures purified airflow.
- Double safety design provides the machine with short-circuit protection and automatic overheating protection.

- Efficient and oil-free lubrication compression pump.
- Causes little noise and requires no maintenance, meaning it will work throughout the day.
- Comes with a 2-year warranty.

- Efficient liquid atomization with medication residue being less than 0.5ml.
- Active particles below 0.5 μm in diameter account for more than 70% of the content.
- Stabilized and evenly sprayed vapor mist effectively prevents coughing in both the elderly and children
- The mist is delivered directly into the lungs, has few side effects and is very effective.

- Unique hanging cup design.
- Portable.
- High polish appearance makes it easy to clean.
- Elegant appearance.
- Excellent manufacturing quality.
- Outstanding surface treatment technique.

Introduction

Indication:
this product is commonly used for the treatment of COPD, asthma, chronic pharyngitis, bronchitis, rhinitis, pulmonary emphysema and other respiratory diseases. It can also be used for patients who need to humidify the respiratory tract and dilute sputum.

※ COPD: chronic obstructive pulmonary disease

Operating principle:
Compressed air produced by the pump will first go through the nebulizer. Based on the Venturi principle, the medication will then break up into small droplets when meeting the gas stream. The medicine inhaled can be quickly delivered to the affected parts of the respiratory tract, thus alleviating symptoms quickly.

Advantages

- European CE certification and quality assurance.
- Adjustable nebulization speed, which can adapt to the nebulization of infants and the elders. The nebulization is more delicate, more uniform and has better effect.
- Imported raw materials, plasticizer free without peculiar smell.
- The mask is designed with air holes to prevent the exhaled exhaust gas from being re-inhaled and to guarantee the nebulization effect. The mask is thickened to guarantee no deformation.
- The tube is moderate softness and can effectively prevent tube bursting.
- The measured effective particle content can reach over 90%, and the nebulization rate is 0.3ml/min.

Design Patent Obtained

Nebulization accessories

Technical Parameters

- Capacity Range: 2-8 ml
- Effective Particle Content: $\geq 70\%$ (NaCl 0.9%)
- Spray Rate: $\geq 0.3\text{ml/min}$ (NaCl 0.9%)

Adjustable Nebulization

Warning

- Nebulizer cups are sterilized products meant for one-time use. Do not use if seal is broken.
